EXPERIENCE

Jai Kisan — Mumbai, India

Software Development Engineer - I — *May 2026 – Present*

- Architected and developed the backend for a production loan recovery platform, automating borrower engagement through **Voice, WhatsApp, and Email agents**.
- Designed a **modular multi-agent architecture** and implemented **Inngest** workflows for reliable asynchronous task execution and agent orchestration.
- Engineered cloud-native services on **GCP/GKE** with **Kafka** for event-driven processing; managed **Kubernetes manifests** and deployments across **staging and production**.
- Integrated **HubSpot APIs** with application workflows to synchronize customer data and automate CRM-driven operations.
- Led end-to-end delivery of a cross-functional project, coordinating engineering teams across **India and the Philippines** through requirements, implementation, testing, and deployment.
- Implemented production observability using **OpenTelemetry, Prometheus, Grafana, and Loki** for distributed tracing, centralized logging, and system monitoring.

Software Development Engineer Intern — *March 2025 – April 2026*

- Developed a loan-and-deals marketplace using **React, Next.js, and TypeScript**, reducing search time by **30%** and improving deal discovery by **15%**.
- Engineered a scalable **RAG pipeline** for financial documents using **LangChain, BAML, and OCR**, enabling hybrid retrieval and automated compliance analysis.

Perceptive Solutions — Remote – Minnesota, United States

Software Developer Intern — *January 2025 – August 2025*

- Built an enterprise AI assistant on **AWS EC2**, integrating logs, transcripts, OneDrive, Teams, and Outlook to automate workflows, saving management **5+ hours weekly**.
- Developed an AI productivity platform using **Python, Transformers, and Scikit-learn**, achieving **90% accuracy** in task-completion forecasting and behavioral analysis.

EDUCATION

Indian Institute of Information Technology, Design and Manufacturing Kurnool — 8.3/10 CGPA

Bachelor of Technology in Computer Science and Engineering — *Expected 2026*

Relevant Coursework: *Data Structures & Algorithms, Cryptography & Network Security, Operating Systems, DBMS, Computer Networks, Cloud Computing, Computer Vision*

PROJECTS

Miraat AI | *FastAPI, JavaScript, TailwindCSS, PostgreSQL, LangChain, Gemini, HTMX* | **Link** — November 2024 – Present

- Built an **AI-powered mental health platform** mirroring structured psychiatric interviews, narrowing **13** diagnostic categories in **5–7** adaptive turns with **crisis-safety gating** and rule-based escalation.
- Designed a **probabilistic Belief State Engine** using **zero-shot classification + grounded LLMs** to update diagnostic confidence and drive targeted question generation.
- Implemented **PII redaction (spaCy NER), AES-256 encryption**, **Dockerized FastAPI** backend on **AWS EC2**, and on-demand **encrypted PDF clinical report** generation.

Saarthi | *Python, PyTorch, Flask, MTCNN, InceptionResnetV1, NLP* | **Link** — August 2024 – October 2024

- Built **dual-mode biometric authentication** (face + voice) using **InceptionResnetV1** and **MTCNN** with real-time pipeline achieving **95% accuracy** and end-to-end **latency under 700ms**.
- Integrated **NLP-based hands-free navigation**, improving accessibility for **visually impaired** users and boosting operational efficiency by **40%**.

ACHIEVEMENTS

- Secured **1st place out of 41 teams** at a GPREC-organized contest by designing “Krishi,” a web platform to empower farmers with digital tools.
- Ranked in the **Top 9** to earn a competitive branch change from **ECE to Computer Science**.

TECHNICAL SKILLS

Languages: JavaScript, Python, TypeScript, C++, SQL

Web & Frameworks: React, Next.js, Node.js, FastAPI, Flask, Tailwind CSS

Databases: PostgreSQL, MySQL, Supabase, Firebase, ChromaDB, Qdrant, FAISS, pgVector

DevOps & Cloud: Git, Docker, Linux, AWS (EC2), Kubernetes, GKE (GCP), Kafka, Inngest, OpenTelemetry, Prometheus, Grafana, Loki

AI & Data Science: LangChain, LangGraph, LangSmith, PyTorch, Scikit-learn, BAML

DSA: 700+ LeetCode problems in C++ **(1700+ Rating)**
